Upholstery Fabrics

www.aristide.be

Aristide is a leading Belgian editor since 1979 of upholstery and curtain fabrics.

*We create our own collections and enable our customers to buy from
the smallest quantity of 1 meter up to whatever they need.*

*For architects, this means that they do not need to worry about any limitations
to their imagination. You can dress any furniture or any room with our fabrics.*

*With a focus on both form and function, we fiercely believe in proven
technologies such as AquaClean and Crypton. These technologies enable
our customers to apply fabrics in the most demanding environments.*

*Throughout this inspirational book, you will see some of our most beautiful
upholstery realizations and hopefully we can inspire you for your next projects.*
